

Properly printed this handout will fold into a neat three-fold document. Set Acrobat Reader to "Auto Rotate and Center Pages" but do NOT set either Adobe Reader/Acrobat Reader or your printer to "Shrink oversize pages to paper size" or to reduce the size to fit the page. The finished page is designed to just barely fit the printable margins of the page in order to get as much as possible on the page in as large a font as possible. If the option is available, duplexing is set along the short edge to align the pages properly.

I prepared the original in Adobe PageMaker, then made a .pdf file. If anyone would like access to the original (which is quite large at about 8 Meg) or would like it modified, please let me know and I will see what I can do.
